

Youssef Fathy Mohamed

Flutter Developer

El-Shorouk, Egypt | 01118412983 | 01147951382 | fathyousef896@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Flutter Developer specializing in Clean Architecture and advanced state management (Provider, GetX, Cubit, Bloc). Experienced in building scalable, high-performance mobile applications with REST API, Firebase and SQLFLITE integration. Proven team leadership skills with a track record of delivering projects ahead of schedule. Committed to write clean, maintainable code and continuously improving technical expertise.

TECHNICAL SKILLS

Programming Languages: Dart, Flutter, Python, C++

Architecture & Principles: Clean Architecture, MVVM, OOP, SOLID Principles, SQLFLITE

State Management: Bloc, Cubit, GetX, Provider

APIs & Backend: REST APIs, JSON, Firebase (Auth, Firestore, Storage)

Developer Tools: Git, GitHub, Android Studio, VS Code

PROFESSIONAL EXPERIENCE

Flutter Developer Intern Oct 2025 – Dec 2025

Word of Mouth Company — Cairo, EG ([Certification](#))

- Developed a full-featured production mobile application using Flutter & Dart, from architecture through deployment.
- Delivered the project 2 weeks ahead of schedule, demonstrating strong time management and delivery discipline.
- Architected reusable, modular UI components to enhance long-term scalability and maintainability.
- Integrated REST APIs and applied performance optimization techniques to improve app responsiveness.

Competitive Programming Trainer 2024 – 2025

ICPC HTI Community — Higher Technological Institute

- Mentored students in competitive programming and algorithmic problem-solving techniques.
- Designed technical problem sets to simulate real contest environments and develop critical thinking.
- Facilitated workshops focused on enhancing analytical thinking and coding efficiency.

PROJECTS

LMS Mobile Application – Team Leader | In Progress

APR 28 -

Higher Technological Institute (HTI)

Full-scale Learning Management System (LMS) mobile application built using Clean Architecture principles.

- Led a development team in designing and building the LMS application, improving workflow efficiency and code quality.
- Implemented core features including course management, user authentication, content delivery, and student progress tracking.

- Applied Clean Architecture to ensure scalability, maintainability, and structured project organization.
 - Conducted code reviews and mentored team members on Flutter best practices and development standards.
- GitHub: [HTI-LMS](#)

Healthy Delivery App (Internship Project) | Lead UI Developer

DEC 4 To DEC 18

- Designed and implemented 15+ complex, responsive screens using Dart and Flutter.
- Focused on high-performance UI rendering and seamless REST API data integration.
- Managed the UI workflow to production-ready code.
- Note: Source code is hosted in a private enterprise repository; visual demo available upon request. ([Video of this App](#))

PharoFit – Flutter Mobile App

Developed a health & fitness app with authentication, YouTube video player integration, and live health news using REST APIs. Improved skills in Flutter, state management, and API integration. [PharoFit](#)

Dokkana – E-Commerce Application Team Leader | In Progress

Full-scale e-commerce platform built on Clean Architecture principles.

- Led the development team, improving overall productivity and maintaining high code quality standards.
- Engineered cart management and product workflow systems using Clean Architecture patterns.
- Conducted regular code reviews and mentored team members on Flutter best practices.

GitHub: [Dokkana-E-commerce](#)

Movies App – Movie Discovery Platform Team Leader

Collaborative movie discovery application with REST API integration.

- Led the full development lifecycle including architecture design and REST API integration.
- Trained the team on GetX state management, improving project scalability and maintainability.
- Implemented advanced search and filtering features to enhance user experience.

GitHub: [MoviesApp](#)

Weather App – Real-Time Weather Application Real-time weather app with maps integration.

- Integrated real-time weather APIs with Google Maps services for location-based updates.
- Implemented Cubit-based state management for a clean, scalable architecture.

GitHub: [WeatherApp](#)

Islami App – Quran & Hadith Browser

Mobile application for browsing Surahs and Hadith content.

- Built a Surah browsing application using Provider state management.
- Structured the app using modular Clean Architecture principles for maintainability. GitHub: [IslamiApp](#)

Quran Streaming & Radio App

Streaming application focused on Quran audio content.

- Developing a Quran streaming and radio application with continuous playback features.
- Implementing GetX, Cubit and Bloc for robust state and media playback management. GitHub: [Spotify](#)

EDUCATION

Computer Science Diploma (Expected) 2023 – 2027 Higher Technological Institute (HTI) — Cairo, EG

Languages:

Arabic (Native) • English (B2 – Upper-Intermediate) • German (A2 – Beginner)
